

Photoshop Using Actions

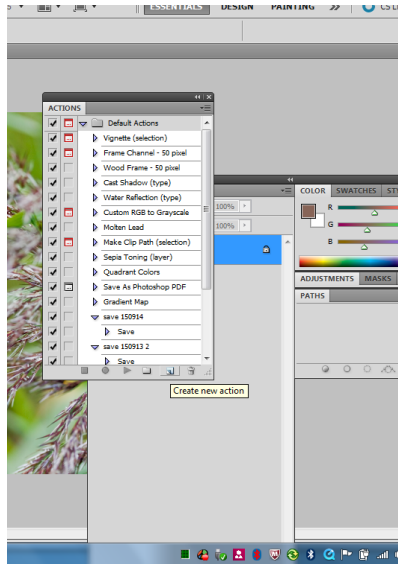

A. Open Photoshop and Bridge

B. Open the files you want to work on via Bridge.

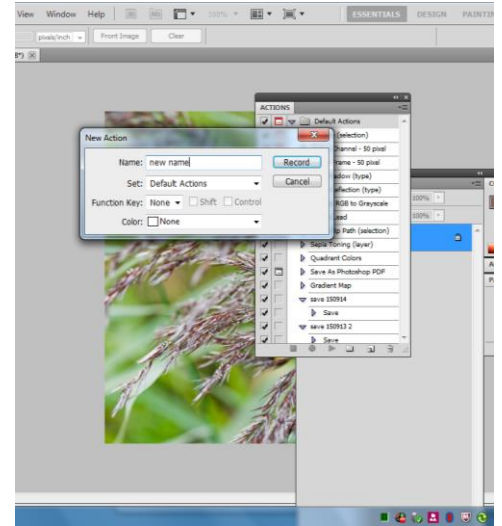

1. Open window then actions

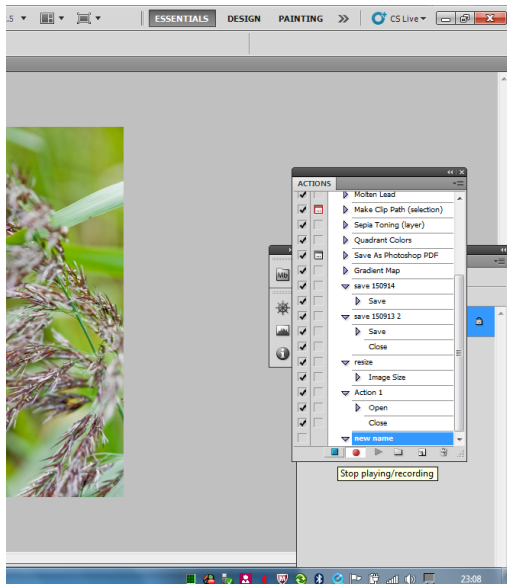

2. Create new action

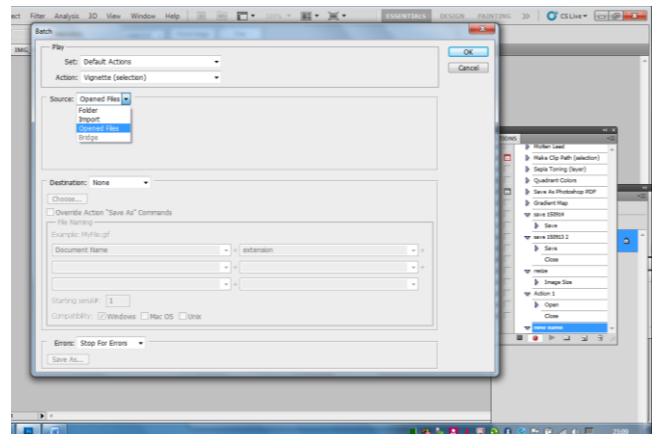

3. Name it something memorable

4. Record the action you want on one file then press stop recording

5. Remove the history from the original file. Then press file, automate, batch, choose the action you have just made and then select that action to happen on all open files

Your action will be undertaken on all open files and save you lots of time!
